WORK EXPERIENCE

Full-Stack Web Developer

SIMPLEPART, LLC / 2019 – 2020

SimplePart powers parts, accessories and service e-commerce programs for the world's most successful automotive OEMs and dealers such as Subaru, VW, Audi, Lexus, BMW, and Volvo.

- Alternated between frontend and backend development duties, fulfilling Full Stack development commitments on multiple projects.
- Worked in an agile environment.
- Converted detailed design mockups into function web pages..
- Developed, coded, and updated B2B and eCommerce sites for multiple clients.
- Pitched in to assist senior developers to meet pressing deadlines.
- Tested websites and performed troubleshooting prior to deployment.

Software Developer/Consultant

IMPROVING / 2019 – 2019

Improving is a complete IT services firm, offering training, consulting, recruiting, and project services that provides innovative solutions and processes that have helped hundreds of clients..

- Worked on an agile team to deliver additions and enhancements for a PowerBI project in the medical sector.
- Created workflow diagrams to clearly demonstrate client web application processes and timelines.
- Researched new technologies, software packages, and hardware products for use in website projects.
- Tested programs and databases to identify issues and make necessary modifications.

Solutions Developer

AVANADE / 2017 – 2018

- Worked as a lead developer on a team to create an insurance quote application from back to front using technologies such as SQL, Entity Framework, .NET Core, c#, HTML, CSS, and Javascript.
- Consulted regularly with internal customers on application development project status, new project proposals, and software-related technical issues.
- Worked closely with other developers to design, write, and implement automated testing for client's software using NUnit.
- Tested troubleshooting methods, devised innovative solutions, and documented resolutions for inclusion in the knowledge base for support team use.

Analyst 1

CGI / 2016 – 2017.

- Updated, modified, and expanded existing web applications using ASP.NET, MVC Framework, and SQL.
- Worked directly with QA to develop end-to-end unit tests.
- Identified problems and formulated alternative solutions in legacy code base.
